### Additional information on employment history

My web: <https://www.jurika.online/>

For the last two years I have been mainly focusing on Angular framework in which I participated on creating 3 projects. I also like to participate on analysis and prototyping of user interface.

Projects:

Map client ZBGIS ([www.zbgis.sk](http://www.zbgis.sk))

ZBGIS Map client has been developed to display and work with ZBGIS data. The application also allows to work with external data in the form of WMS, WMTS services and vector data in multiple formats.

ESKN Portal (<https://kataster.skgeodesy.sk/Portal>)

The web application is used for searching and visualizing of information from the real estate cadastre.

Transformation service (<https://zbgis.skgeodesy.sk/rts/en/Transform>)

Transformation service performs the authorized transformation of point coordinates between geodetic reference systems.

## LANGUAGE SKILLS

---

**English** - Upper intermediate (B2)

**German** - Elementary (A2)

## OTHER KNOWLEDGE

---

**C#** - advanced  
**HTML** - expert  
**JavaScript** - expert  
**ASP.NET** - advanced  
**CSS** - expert  
**SQL** - advanced  
**UML** - advanced  
**PostgreSQL** - advanced
